**2. Lower Sproul Update (Anthony Galace)**

- Continuation from last semester. Updates
- We have about 1600 square feet in semi-private offices
- At the recent Working Group meeting, the architects proposed something else
- They changed the RRC spaces so that it would be more centralized and together and further away from the Practice and Performance space
- The square footage is “negligibly” smaller. Only a 30 square foot difference

Do we like the proposed change or are we more comfortable with the original agreement?
