

# Before you turn on that faucet...

Conserve water!  
Help save the  
environment!

## *Did you know that:*

- Turning off the water when you brush your teeth, shave, or wash your face can save 10 to 20 gallons of water per person per day?
- The bathroom accounts for 75% of water use in the home?
- Each toilet flush uses up to five gallons of water? Multiply that by the number of times each person flushes per day by the number of people per floor by the number of floors per building by the number of buildings... that's a lot of water!
