Preface xv

1 The Concept of Consciousness 1

The Psychology of Consciousness 2

Overview of This Book 3

Mind 5

Concepts of Consciousness 5

Consciousness as awareness 6

Consciousness as wakefulness 8

Consciousness as an executive control system 8

Consciousness in cognitive psychology 9

A Level of Consciousness Model 11

Primary and reflective consciousness 12 *Focal*
and peripheral awareness 15 *Nonconscious mind* 16

Comparison to Freud's levels of consciousness 20

Summary 21

Endnotes 22

2 Characteristics of Consciousness 24

Higher-Order Characteristics of Consciousness 25

Subjectivity 25 *Change* 25 *Continuity* 27

Intentionality ("Aboutness") 28 *Selectivity* 28

Aspects of Conscious Experience	29
<i>Sensory perception</i>	30
<i>Mental imagery</i>	32
<i>Inner speech</i>	33
<i>Conceptual thought</i>	34
<i>Remembering</i>	35
<i>Emotional feeling</i>	37
<i>Volition</i>	38
<i>Self-awareness</i>	40
The Unity of Consciousness	41
Summary	43
Endnotes	43
3. Introspection I: Methods and Limitations	45
Introspection and Introspective Verbal Reports	46
Types of Introspection	48
Limitations of Introspective Verbal Reports	50
Methods of Obtaining Introspective Reports	54
The Process of Introspection	56
<i>What introspection is not</i>	56
<i>What introspection is</i>	58
Conclusion	61
Summary	61
Endnotes	62
4 The Mind-Body Problem	64
Approaches to the Mind-Body Problem	65
<i>Why the mind-body problem is important</i>	66
Dualism	66
<i>Parapsychological experiences: evidence for dualism?</i>	68
Varieties of Materialism	72
<i>Epiphenomenalism</i>	72
<i>Identity theory</i>	72
<i>Emergent interactionism</i>	75
<i>Functionalism</i>	77
Reductionism	79
The Other-Minds Problem	81
<i>The argument from analogy</i>	81
<i>The argument from hypothetico-deductive theory</i>	87
<i>Concluding comment</i>	88
Summary	88
Endnotes	89
5 Brain and Consciousness I: Split-Brain Research	90
A Brief Overview of Brain Organization	91
Split-Brain Research	96
<i>Neuropsychological testing</i>	97
The Question of Dual Consciousness	103
<i>The problem</i>	103
<i>The evidence</i>	105
Consciousness, Language, and Brain Modularity	111
<i>Evidence for consciousness in P.S.'s right hemisphere</i>	111

- The interpretive cortex and the illusion of mental unity* 114 *Discussion of Gazzaniga's ideas* 118
- Left-Brain, Right-Brain Mania 120
- Summary 122
- Endnotes 123
- 6 Brain and Consciousness II: Dissociations between Consciousness and Behavior 126**
- Blindsight 128
- Amnesia 132
- Other Neuropsychological Dissociation Syndromes 136
- Explaining Dissociation Syndromes 139
- Nonconscious Processing in Normal Subjects 143
- Summary 150
- Endnotes 151
- 7 Introspection II: Access to the Causes of Behavior 152**
- Nisbett and Wilson's Anti-Introspectionist Theory 153
Research and conclusions 154 *Critique of Nisbett and Wilson's theory* 159
- Evidence for Introspective Access 161
Experiments with within-subjects designs 161
Types of information people use to explain their own behavior 163
- Conclusions 166
Conditions that promote introspective access 167
- Summary 168
- Endnotes 169
- 8 Daydreaming and the Stream of Consciousness 170**
- Dimensions of Thought in Normal Waking States 171
Evidence for Klinger's dimensions of thought 175
- Research on Daydreaming 177
Individual differences in daydreaming 178
Experimental studies of factors that affect daydreaming 181 *Physiological correlates of daydreaming and imagery* 187
- The Functions of Daydreaming 189
- Sensory Deprivation and Consciousness 190
Research on effects of restricted environmental stimulation 190 *Implications of restricted stimulation effects for consciousness* 193
- Toward a Theory of the Stream of Consciousness 194
General considerations 194 *Factors affecting*

- attention to external events versus daydreams* 195
- Factors affecting the direction of external attention* 196
- Factors affecting the contents of daydreams* 196
- The sequencing of thoughts* 198

Summary 199
Endnotes 200

9 Altered States of Consciousness 202

- The Variety of ASCs 202
- The Importance of ASCs 203
 - Functions of ASCs* 203
 - Why study ASCs?* 204
- The Concept of Altered States of Consciousness 205
 - Definition of altered state of consciousness* 205
- Dimensions of Changed Subjective Experience in ASCs 207
- Producing Altered States of Consciousness 212
- Identifying Specific ASCs 214
- Studying ASCs: Subjective and Objective Knowledge 217
- Summary 218
- Endnotes 219

10 Sleep 220

- Sleep-Wake Cycles 221
- Stages of Sleep 222
 - Physiological criteria for REM and NREM sleep* 223
 - The structure of sleep* 225
 - Other physiological and behavioral correlates of sleep stages* 229
 - The physiological basis of sleep cycles* 233
- The Function of Sleep 234
- Sleep Deprivation and Human Performance 235
- The Function of REM Sleep 238
 - Effects of REM sleep deprivation in humans* 238
 - Ideas about the function of REM sleep* 240
- Sleep Disorders 242
 - Primary sleep disorders* 243
 - Parasomnias* 245
 - Insomnia* 249
 - Drugs and sleep* 251
- Summary 251
- Endnotes 252

11 Dreaming I: Phenomenology and Influences on Contents 254

- Definition of "Dream" 255
- Phenomenological Characteristics of REM Dreams 256
 - Methods of studying dreams* 256
 - Normative study of REM dreams* 258
- Dreaming in NREM Sleep 263

The controversy over NREM dreaming 263
Comparison of REM and NREM sleep mentation 265
 Laboratory Dreams Compared with Home Dreams 267
 Between Wakefulness and Sleep: The Hypnagogic State 269
 Factors that Influence Dream Contents 270
 Demographic and cultural factors 271 *Personality and psychopathology* 272
 Current personal concerns and mood 275 *Recent waking experiences* 277
 Stimuli during sleep 282 *Conclusion* 285
 Summary 285
 Endnotes 286

12 Dreaming II: Theories and Research 288

Sigmund Freud's Psychoanalytic Theory of Dreaming 289
 Characteristics of dreams 290 *How dreams are produced* 290
 Evaluation of Freud's theory of dreaming 293
 Hobson and McCarley's Neurophysiological Theory of Dreaming 295
 Hobson and McCarley's definition of dream 295 *Two sides of the activation-synthesis hypothesis* 296
 Research relevant to the activation-synthesis hypothesis 298
 Summary and conclusion 302
 David Foulke's Cognitive Theory of Dreaming 303
 The characteristics of dreams 303 *A cognitive theory of dreaming* 305
 Children's dreams 308
 Evaluation of Foulke's theory 311
 The Functions of Dreaming 313
 Summary 314
 Endnotes 315

13 Dreaming III: Dream Recall and Lucid Dreaming 317

Dream Recall and Forgetting 317
 The interference hypothesis 318 *The salience hypothesis* 320
 The repression hypothesis 321
 The physiological-state hypothesis 322
 Conclusion 323
 Lucid Dreaming 313
 Becoming aware that you are dreaming 324 *Methods of increasing lucid dream frequency* 326
 Laboratory studies of lucid dreaming 327 *Characteristics of lucid dreams and dreamers* 329
 Applications and conclusions 330
 Concluding Comment on Dreaming 331

Summary 332

Endnotes 333

14 Hypnosis I: Basic Phenomena, Hypnotic Susceptibility, and Applications 334

The Definition of Hypnosis 337

A working definition of hypnosis 337

Suggestion 338

Hypnotic Induction 340

The Measurement of Hypnotic Susceptibility 341

Types of Hypnotic Suggestions 344

Ideomotor suggestions 344 *Response-inhibition*

(challenge) suggestions 345 *Cognitive*

suggestions 345 *Posthypnotic suggestions* 348

The Subjective Experience of Hypnosis 349

Trance depth 350 *Involuntariness of responses* 352

Correlates of Hypnotic Susceptibility 354

J. Hilgard's interview studies of personality

and hypnotizability 355 *Absorption and mental*

imagery vividness 356 *Other correlates*

of hypnotizability 358

Can Hypnotic Susceptibility be Modified? 360

Clinical Applications of Hypnosis 364

Involuntary disorders: pain, warts, and asthma 366

Voluntary disorders: smoking and overeating 367

Concluding comments on hypnotherapy 368

Is Hypnosis Dangerous? 369

The question of coercion through hypnosis 371

Summary 373

Endnote 374

15 Hypnosis II: Theories and Research on Hypnotic Analgesia and Posthypnotic Amnesia 375

Hypnosis Theories: Overview 375

Is hypnosis an altered state of consciousness? 376

Are hypnotic responses real? 377

Hypnotic Analgesia and Hypnosis Research

Methodologies 379

The high-low method 379

The real-simulator method 381

Hilgard's Neodissociation Theory 383

The hidden observer 385

The Social-Psychological Approach to Hypnosis 390

The social-cognitive view of hypnotic analgesia 391

The hidden observer examined 393

Posthypnotic Amnesia 394
Explanations of posthypnotic amnesia 394
Breaching posthypnotic amnesia 396
Disorganized retrieval in posthypnotic amnesia 397
Conclusions regarding posthypnotic amnesia 398
 Summary 399
 Endnotes 400

16 Hypnosis III: Hypnotic Age Regression and Hypermnesia 401

Hypnotic Age Regression 402
Research on age regression 402 *Age regression and reinstatement of a childhood affective state* 403
Explanations of apparent age regression 405
 Response Incongruities and Trance Logic 407
 Hypnotic Hypermnesia 409
Research on hypnotic hypermnesia 410 *Implanting pseudomemories during hypnosis* 413 *Implications of hypermnesia research for forensics and psychotherapy* 415
 Concluding Comments on Hypnosis 416
 Summary 419
 Endnotes 419

17 Meditation 421

Aims of Meditation 421
 Types of Meditation Techniques 423
 Concentrative meditation 423
 Mindfulness meditation 424
 How to Meditate 426
 Effects of Meditation: A Case Study 427
 Effects of Meditation: Systematic Research 429
 Phenomenological effects of meditation 430
 Effects on physiological arousal 431
 Brain wave changes 433
 Long-Term (Trait) Effects of Meditation 436
 Meditation research designs and their problems 436
 Personality and cognitive effects of meditation 438
 The Meditation Paradox 440
 Mystical Experiences 441
 Biofeedback and the "Alpha" State: Electronic Meditation 444
 Summary 446
 Endnotes 447

18 Psychedelic Drugs I: Marijuana 449

- A Brief History of Marijuana Use 451
- Subjective Effects of Marijuana 454
- Experimental Research on Marijuana 458
 - Experimental procedures* 458
 - Physiological effects of marijuana* 459
 - Cognitive effects of marijuana* 460
 - Social and personality effects of marijuana* 469
- Interpretations of Marijuana's Effects 471
- Is Marijuana Harmful? 472
- The Marijuana Paradox 475
- Summary 476
- Endnotes 476

19 Psychedelic Drugs II: The Major Hallucinogens 478

- Psilocybin Mushrooms 478
- Peyote 481
- LSD 482
- Hallucinations 485
 - Systematic analysis of drug-induced visual hallucinations* 486
 - How hallucinations are produced* 491
- Concluding Comments on Psychedelic Drugs 494
- Summary 496
- Endnotes 497
