

Subject Index

A

- Absorption Scale, 356-57
- Age regression, hypnotic (see Hypnotic age regression)
- Alien hand, in split-brain patients, 106
- Alpha state, and biofeedback, 444-46
- Altered states of consciousness (ASC)
 - defined, 3, 202, 205-7
 - dimensions of changed subjective experience in, 207-12
 - functions of, 203-4
 - identifying specific ASCs, 214-16
 - mapping of, 215
 - as natural concepts, 216-17
 - production of (induction techniques), 212-14
 - quasi-operational definitions of, 215-16
 - varieties of, 202-3
- Amnesia:
 - anterograde, 27, 132-36, 139-40
 - posthypnotic (see Hypnotic amnesia)
 - source, 36
- Analgnesia, hypnotic (see Hypnotic analgesia)
- Aphasia, 138
- Arousal, 195-96, 211
- Attention, 10-11, 195-96, 197
 - capacity, 11
 - selective, 11, 28-29
- Automatic processes, 10, 17-18

B

- Behavior, a priori theories about causes of, 155-56
- Behaviorism, 2, 46-47, 72
- Behaviorism, logical, 78
- Biofeedback, and "alpha" state, 444-46
- Blindsight, 128-32, 139-40
- Blind-touch, 136
- Body image, 212
- Brain organization, 91-96
 - cerebral cortex, 92-94
 - contralateral organization, 94-96, 97, 129
 - corpus callosum, 95

C

- Cocktail party effect, 146
- Cognitive psychology, and consciousness, 9-11, 126, 151en
- Commissurotomy, 96 (see also Split-brain patients)
- Conceptual thought, 34-35

- Concordance, doctrine of, 126, 144
- Connectionist models, 79
- Conscious experience, 62-63en
 - alternative terms for, 23en
 - aspects of, 29-41
- Consciousness:
 - altered states of (see Altered states of consciousness)
 - in animals, 84-87
 - anoetic (Tulving), 35-36
 - auto-noetic (Tulving), 35-36
 - contents of, 7, 26
 - definition, 6
 - dual, in split-brain patients, 111-14, 125
 - as executive control system, 8-9
 - higher-order characteristics of, 25-29
 - change, 25-27
 - continuity, 27
 - intentionality ("aboutness"), 28
 - selectivity, 28-29
 - subjectivity, 25
 - interpreter system and, 7 (see also Interpretation processes; Interpreter system)
 - language and, 111, 118
 - levels model of, 11-21
 - and memory, types of (Tulving), 35-37
 - metaphorical descriptions of, 6, 22en
 - noetic (Tulving), 35-36
 - as personal construction, 29
 - primary, 12-15, 119-20
 - "pure," 7, 447en
 - reflective, 12-15, 119-20
 - in sleep, 330-31
 - state of (James), 26, 44en
 - stream of (James), 27, 170-71
 - factors that influence, 194-99
 - temporal gaps in, 27, 42
 - transcendental, in meditation, 443, 447en
 - unity of, 41-43, 117
 - as wakefulness, 8
- Controlled (effortful) processes (processing), 10, 18
- Correlation coefficients, 169en
- Covariation assessment, in explaining one's behavior, 164-66
- Cross-cueing, in split-brain patients, 107

D

- Daydreaming:
 - current concerns, effects of, 196-97
 - factors that influence, 194-99
 - functions of, 189-90
 - incentives for, 184
 - and information load, 181-83
 - personality styles of, 178-80

- Daydreaming (*cont'd*)
 physiological correlates of, 187-88
 processing requirements of, 185-87
 temporal cycle in, 188-89
- Deautomatization, in meditation, 443
- Deja vu, 333en, 443
- Demand characteristics (experimental demands), 52-53
- Depersonalization, 27, 41, 211
- DICE model (Schacter) to explain dissociation syndromes, 140-43, 151en
- Dichotomies of mind, 120-21
- Dissociation, in neuropsychological syndromes, 127-28
- Dissociation theory 20
 (*see also* Hypnosis theory, neodissociation)
- Dream contents:
 compensation hypothesis (Jung), 271, 313
 continuity between REM and NREM periods, 266-67
 continuity hypothesis, 271, 314
 and eye movements (*see* Dream contents, physiological correlates)
 factors that influence, 270-85
 current personal concerns and mood, 275-77
 demographic (age, gender) and cultural factors, 271-72
 personality and psychopathology, 272-75
 recent waking experiences, 277-81
 stimuli during sleep, 282-84
 incorporation (direct, associative, symbolic), 277-79
 manifest versus latent, 254, 289
 physiological correlates, isomorphic correspondence with, 300-302
 types of effects on, 277-79
- Dream diary, 257-58
- Dreaming:
 in children, 308-11
 functions of, 313-14
 lucid (*see* Lucid dreaming)
 in NREM sleep, 263-66, 286en,
 REM versus NREM characteristics, 265-66
- Dreaming, theories of:
 activation-synthesis (Hobson and McCarley), 295-303
 cognitive theory (Foulkes), 303-12
 and dream interpretation, 255
 historical stages of, 288-89
 psychoanalytic theory (Freud), 254-55, 289-95, 298
- Dream recall, 317-23
 improving, suggestions for (for dream diary), 257-58
 and interference, 257, 318-20
 and physiological state, 322-23
 and repression, 293, 321-22
 and salience, 268, 320
 selective, 268
- Dreams:
 in Bible, 254, 286en
 bizarreness of, 260, 299-300
 characteristics of, normative study, 258-62
 day residues in, 254, 293 (*see also* Dream contents, factors that influence, recent waking experiences)
 defined, 255-56, 264-65, 295-96
 emotionality in, 260
 forgetting of (*see* Dream recall)
 laboratory versus home, 267-69
 symbolism in, 277-78 (*see also* Dreaming, theories of; Dreamwork process, psychoanalytic theory)
 time experience in, 262-63
 (*see also* Dream contents; Dreaming; Dreaming, theories of; Dream recall)
- Dreamwork process (in Freudian theory), 290-93
- Drugs:
 caffeine, 251, 450
 definition, 449
 hallucinogenic, 451, 478 (*see also* Hallucinogenic drugs)
 and interaction model (Tart), 450-51
 psychedelic, definition and types, 449, 451
 psychoactive, types of, 449-51
 and sleep, 245, 250-51
 (*see also* Marijuana)
- Dualism:
 Cartesian, critique of, 67-68
 interactionist (Cartesian), 66-67
 parallelist (Leibniz), 67
- Dyslexia, 137

E

- EEG (electroencephalogram) (*see* Sleep, stages of, other physiological correlates)
- Emergent interactionism, 75-77
- Emotions, 197, 211
 feeling of, 37-38
 primary, 37
- Epiphenomenalism, 72, 89
- Erections, of penis during sleep, 231-33, 301, 316en
- Explicit knowledge, 128 (*see also* Implicit knowledge)
- Exteroception, 30

F

- Factor analysis, 200en
- Flashbacks, 484
- Focal awareness, 15
- Forced choice procedure, 130
- Fugue state, 20
- Functionalism, 77-78

H

- Hallucinations:
 - definition, 71, 209, 485
 - hypnotic, 345-46, 407
 - production of, with hallucinogenic drugs, 485-94
 - in sensory deprivation, 190-91
- Hallucinogenic drugs, 451, 478
 - LSD, 210, 482-85, 490
 - Mescaline, 219, 482, 490
 - Peyote, 481-82
 - Psilocybin mushrooms, 478-81, 490
- Hashish, 453 (see Marijuana)
- Hemineglect, 138-39
- Hidden observer (see Hypnosis and hidden observer)
- Highway hypnosis, 27-28
- Hypermnesia, hypnotic (see Hypnotic hypermnesia)
- Hypnagogic state (transition to sleep), 256, 269-70
- Hypnosis:
 - aftereffects (sequelae), 370-71
 - clinical applications of, 364-69
 - coercion through, question of, 371-73
 - dangers, question of, 369-71
 - definition of, 337-38
 - and hidden observer, 20, 385-90, 393-94, 407-9, 418
 - history of, 334-36, 375-76
 - implications for consciousness, 418-19
 - induction methods, 338, 340-41
 - involuntariness of response in, 352-54, 378-79, 395, 398
 - research methods:
 - high-low method, 379-81
 - simulator controls, 381-83, 408-9, 420en
 - response incongruities in, 407-9
 - subjective experience of, 349-50
 - trance depth in, 350-52
 - trance logic in, 401, 407-9
- Hypnosis theory:
 - altered state view, 336, 376-77, 416
 - concluding comments on, 416-19
 - neodissociation (Hilgard), 20, 336, 383-85

- (see also Hypnosis and hidden observer)
 - social-psychological approach, 336, 353-54, 390-91, 416-17
 - special-process view, 336, 416-17
- Hypnotherapy, 364-69
- Hypnotic age regression, 346-47, 402-7
 - affective, 403-5
 - cognitive, 402-3
 - duality experience in, 407-9
 - explanations of, 405-6
 - and reincarnation, 406-7
- Hypnotic amnesia (posthypnotic amnesia), 347-48, 394-99
 - breaching of, 396-97
 - disorganized retrieval in, 397-98
 - explanations of, 394-96, 398-99
- Hypnotic analgesia (pain control)
 - clinical applications, 335, 366, 369
 - faking (by Mark Twain), 377-78
 - hidden observer in, 386-90, 393-94
 - research methods in, 379-83
 - social-cognitive explanation of, 391-93
- Hypnotic hypermnesia, 401, 409-19
 - in age regression, 403, 410
 - experimental studies, 411-13
 - implications for forensics (criminal investigations) and psychotherapy, 415-16
 - response criterion shift in, 411-13
- Hypnotic suggestions:
 - definition of, 338
 - objective and subjective responses to, 339
 - reality of responses to, and faking, 378-79, 395, 398
 - types of, 341, 344-49
 - age regression, 346-47
 - cognitive, 345
 - dreams, 347
 - hallucinations, positive, 345-46, 407
 - hallucinations, negative, 346
 - ideomotor, 344-45
 - posthypnotic amnesia, 347-48
 - posthypnotic suggestions, 348
 - response-inhibition (challenge), 345
- Hypnotic susceptibility (hypnotizability), 340
 - and brain waves, 360
 - correlates of, 354-60
 - Harvard Group Scale of, 342
 - measurement of, 341-44
 - modification of, 360-64
 - Stanford Scale of (Form C), 343

I

- Identity theory, 72-75
- Image, mental, defined, 32, 256

Imagery, mental, 32-33, 175-76, 208-9
 Imagery vividness, 357-58
 Implicit knowledge, 128
 Implicit memory, 17, 134-36
 Induction, hypnotic (*see* Hypnosis, induction methods)
 Induction principle, in daydreaming, 198
 Ineffable experiences, 52, 210, 443
 Intelligent behavior, and other-minds problem, 84-86, 105
 Intentionality ("aboutness") of consciousness, 22en, 28
 Interception, 30
 Interpretation processes, 7, 42
 in drug states, 495
 in hypnosis, 419
 in sleep, 331
 Interpreter system, and consciousness, 114-20, 125
 Introspection, 13, 45-46
 argument from (*re. dualism*), 67-68
 explanations of, 56-61
 reconstruction and inference in, 51, 53, 60, 153
 and reflective consciousness, 13, 62en
 as retrospection, 58-60
 sources of belief in, 158
 types of, 48-50
 (*see also* Introspective verbal reports)
 Introspective access to the causes of behavior, 152-69
 anti-introspectionist theory (Nisbett-Wilson), 153-61
 conditions that promote, 167-68
 criterion for, 157-58
 evidence for, 161-66
 Introspective sensitization, 191
 Introspective Uncertainty Principle, 52
 Introspective verbal reports, 7, 13
 compared to ordinary verbal responses, 47-48
 limitations of, 50-54
 methods of obtaining, 54-56
 and other-minds problem, 83-84, 104
 Inverted spectrum thought experiment, 78
 Isomorphism, causal, 74
 Isomorphism, in dreams (*see* Dream contents, physiological correlates)

J

Jet lag, 221

K

Knowledge, declarative, 17
 (*see also* Memory, episodic and semantic)

L

Levels-of-processing theory, and consciousness, 10
 Lexical decision task, 138, 144
 LSD (*see* Hallucinogenic drugs)
 Lucid dreaming, 256, 323-31
 applications of, 330-31
 methods of increasing, 326-27
 physiological correlates of, 328-29
 sexual activity in, 329
 Lunch-line effect, 146

M

Marijuana:
 and amotivational syndrome, 473
 automobile driving, effects on, 462
 creativity, effects on, 468-69
 experimental procedures, 458
 explanations of psychological effects, 471-72
 first-time effect, 457, 477en
 harmful effects, question of, 472-75
 history of use, 451-54
 memory, effects on, 462-64
 mood, effects on, 470
 paradox of, 475-76, 496
 physiological effects, 459-60, 474
 and psychiatric symptoms, 470-71
 sensory-perceptual effects, 460-61
 social cognition, effects on, 469-70
 as a "stepping stone" to other drugs, 473-74
 subjective effects, 454-57
 time estimation, effects on, 464-67
 Masking procedure, pattern, 144
 Materialism, 65-66, 72-80, 90
 eliminative, 79-80
 reductive, 73
 Meditation:
 aims or goals of, 421-23
 and anxiety reduction, 438-39
 arousal, physiological, effects on, 431-33
 brain wave changes during, 433-36
 concentrative, 423-24
 definition, 421
 effects of, case study, 427-29
 method of, practical suggestions, 426-27
 mindfulness type ("opening up"), 424-25
 paradox of, 440-41
 personality and cognitive effects of, 438-39
 phenomenological (subjective experience) effects, 430-31
 and psychotherapy, 429, 439
 research designs and problems, 436-37

- and sleep, 434-35
- techniques of, 423-27
- Transcendental (*see* Meditation, concentrative)
- Memory:
 - episodic, 17, 35-36
 - procedural, 18, 35-36
 - semantic, 17, 35-36
 - types of, and consciousness (Tulving), 35-37
- Mental process, 5, 22en
- Mentation, stimulus-independent (SIM), 172, 182
 - (*see also* Daydreaming)
- Mescaline (*see* Hallucinogenic drugs)
- Mesmerism, 334
- Meta-consciousness, 15
- Mind, definitions of, 5
- Mind-body (mind-brain) problem:
 - dualist versus materialist approaches to, 65-66
 - its importance, 66
 - (*see also* Dualism; Emergent interactionism; Epiphenomenalism; Functionalism; Identity theory)
- Mind/brain system, 5
- Mind system, 22en
- Modules, cognitive or brain, 114, 117, 124en, 140-41
- Monitoring system, 9, 149
- Motivational sequence, 39-40
- Motive, defined, 19
- Motives, nonconscious, 19
- Multiple personality, 19
- Multistore theory, and consciousness, 10-11
- Mystical experiences (mystical states), 441-44
 - features of, 442-43
 - scientific approach to, 443-44

N

- Narratization, 34
- Near-death experience (NDE), 70-72
- Nightmares, 273-75
- Night terrors (*see* Sleep disorders)
- Night work shifts, and sleepiness, 221-22, 235
- Nonconscious mind:
 - defined, 16
 - levels of, 16
 - types of contents and processes, 16-19, 127
- Nonconscious perception, 16-17, 143-49

O

- Orienting response (OR), 151en
- Other-minds problem, 80-88
 - argument from analogy, 81-82
 - argument from behavioral criteria, 83-86
 - argument from hypothetico-deductive theory, 87
- Out-of-body experience (OBE), 69-70, 455

P

- Pain control (*see* Hypnotic analgesia)
- Parapsychological experiences, 68-72
- Perception, constructivist theory of, 31
- Perception, sensory, 30-32
- Perceptual awareness, reflective, 44en
- Perceptual cycle, 31
- Perceptual representation system (PRS), 136, 151en
- Peripheral awareness, 15, 63en
- Phenomenal experience, 23en
- Placebo controls, 458-59
- Polygraph, 223
- Preattentive processes, 17
- Preconscious (Freud), 21
- Priming effect, associative, 144
- Priming effect, repetition, 134-36
- Prosopagnosia, 137
- Pseudomemories, 413-15

Q

- Qualia, 68, 78-79

R

- Reconstruction errors, in introspective reports, 51
- Reductionism, 79-80
- Reflexive consciousness, 23en
 - (*see also* Consciousness, reflective)
- Remembering, as an aspect of consciousness, 35-37
- Repressed memories, 17
- Restricted Environmental Stimulation Technique (REST), 190
 - (*see also* Sensory deprivation)
- Right hemisphere, consciousness in, 111-14, 125

S

- Schemata, 31
- Self-awareness, 13, 40-41, 86-87
- Self concept, 13, 40-41, 212
- Self-control, 211, 471
- Self-efficacy, perceived, 41
- Self-hypnosis, 338, 348
- Self-recognition, in split-brain patients, 108-10
- Sensory deprivation, 190-94
- Short-term memory (STM), 10
(*see also* Working memory)
- Simulator controls (*see* Hypnosis research methods)
- Sleep:
- cycles, 220-21, 233
 - defined, 220
 - deprivation, and human performance, 235-38
 - and dreams (*see* Dreaming, Dreams, etc.)
 - drug effects on, 251
 - function of, 234-35
 - mentation, 255
 - REM (rapid-eye-movement) stage
 - cycles, physiological basis of, 234
 - cycles, temporal pattern, 226-27
 - deprivation, effects of, 238-40
 - discovery of, 222-23
 - function of, 238-242
 - in infants, 227-29
 - physiological criteria of (EEG, EOG, EMG), 223-25, 227
 - stages of, 222-34
 - EEG (brain wave) correlates, 223-26
 - other physiological correlates, 229-33
 - Sleep disorders, 242-51
 - hypersomnia, 245
 - insomnia, 249-51
 - narcolepsy, 243-45
 - night terrors, 245-46, 273
 - Sleeptalking, 247-48
 - Sleepwalking (somnambulism), 246-47
 - Spatialization, 32
 - Speech, inner, 33-34, 176
 - Split-brain patients, neuropsychological testing of, 97-103
 - Stimulus hunger, 192
 - Subconscious knowledge, 19-20
 - Subjective experience, 7

- Subliminal perception, 143-46
(*see also* Nonconscious perception)
- Suggestibility, 192-93, 211
- Suggestions, hypnotic (*see* Hypnotic suggestions)
- Synesthesia, 208

T

- THC, 490
(*see also* Marijuana)
- Thinking out loud, 54
- Thought, dimensions of, 171-77
- fanciful versus realistic thoughts, 173-74
 - operant versus respondent thoughts, 172-74, 176
 - stimulus-bound versus stimulus-independent thoughts, 173-74
- Thought sampling, 54-55
- Thought, verbal, (*see* Speech, inner)
- Threshold, subjective, 145
- Time experience, 210-11, 446-47
- Trance, hypnotic, 336, 348
(*see also* Hypnosis, trance depth in)
- Trance logic (*see* Hypnosis, trance logic in)

U

- Unconscious (Freud), 20
(*see also* Nonconscious mind)

V

- Volition, 38-40

W

- Will, free, and determinism, 40
- Working memory (short-term memory), and consciousness, 10

Z

- Zen Buddhism, 422
(*see also* Meditation, techniques of)
