Senate Bill 493
Allows all California RPhs to

- Administer drugs and biologics pursuant to a prescription
- Provide prescription smoking cessation, oral contraceptives, and travel meds
- Access medical records
- Independently initiate and administer immunizations to patients three years of age and older
- Order/interpret tests for monitoring/managing the efficacy/toxicity of drug therapies, in coordination with the patient’s physician
Additional Advanced Practice Pharmacist allowances:

- Perform patient assessments
- Initiate, adjust, and discontinue drug therapy pursuant to an order by a patient’s treating prescriber and in accordance with established protocols
- Participate in evaluation and management of diseases and health conditions in collaboration with other healthcare providers.
